

Vulmantigraffiti

Product description:

Vulmantigraffiti is a water-based detergent. It is suitable for removing graffiti from various objects such as railway cars, buses, buildings and similar surfaces, aluminium and wood surfaces. Before applying, it is recommended to test the reactions with a primer paint. The product can be also used for concrete, tiles etc.

Product data:

properties: colourless liquid
shelf life: 24 months in original packaging in dry conditions at a temperature higher than 0 °C

Theoretical capacity:

1 – 3 m²/kg depending on the material to be cleaned (glass, concrete, metal), or its absorption capacity

Application methods:

brush

Instructions for use:

Apply the remover consistently in a concentrated (undiluted) form onto the surface and let react until the graffiti is dissolved, 5 minutes – 1 hour, depending on the surface, type of pollution and weather conditions. After dissolving, wipe thoroughly with a cloth and rinse with warm water.

Safety:

Vulmantigraffiti – when handling, proceed in accordance with the general safety measures, follow the safety instructions on the packaging labels and on safety data sheets. Data, specifications, directions and recommendations given in this technical data sheet are based on experience gained in modeling of supposed ways of applications, or under specially defined conditions. Their accuracy, completeness or appropriateness under the actual conditions of any intended use is not guaranteed and must be determined by the user. The manufacturer and distributor are not responsible for the results achieved, loss, direct or consequential damages arising from failure to comply with the recommended use of the product, which go beyond the conditions herein.
